## 2. Product Specifications

## Industrial Multi-port 10/100TX

Fast Ethernet Switch
ISW-1600T/IFGS-1822TF

Version 1.0
User's Manual

| Product | ISW-1600T | IFGS-1822TF |
| :---: | :---: | :---: |
| Hardware Specifications |  |  |
| Fast Ethernet Copper Ports | 16 10/100BASE-TX RJ45 auto-MDI/MDI-X ports |  |
| Gigabit Ethernet Copper Ports | -- | Two <br> 10/100/1000BASE-T <br> RJ45 auto-MDI/MDI-X <br> ports <br> (shared with Port-17 <br> and Port-18) |
| SFP Slots | -- | Two 1000BASE-SX/ LX/BX SFP interfaces (shared with Port-17 and Port-18) |
| Switch Architecture | Store-and-Forward |  |
| Switch Fabric | 3.2Gbps <br> (non-blocking) | 7.2Gbps (non-blocking) |
| Throughput (packet per second) | 2.38Mpps@ 64 bytes | 5.36Mpps@ 64 bytes |
| Address Table | 16 K entries, automatic source address learning and aging |  |
| Shared Data Buffer | 4Mbits |  |

| Standards Compliance | IEEE 802.3 10BASE-T <br> IEEE 802.3 u <br> 100BASE-TX <br> IEEE 802.3x flow <br> control and back pressure <br> IEEE 802.1p Class of Service <br> IEEE 802.3az Energy Efficient Ethernet (EEE) | IEEE 802.3 10BASE-T <br> IEEE 802.3u <br> 100BASE-TX <br> IEEE 802.3ab Gigabit 1000T <br> IEEE 802.3z Gigabit SX/LX <br> IEEE 802.3x flow control and back pressure <br> IEEE 802.1p Class of Service <br> IEEE 802.3az Energy Efficient Ethernet (EEE) |
| :---: | :---: | :---: |
| Environment |  |  |
| Operating Temperature | $-40 \sim 75$ degrees C |  |
| Storage Temperature | $-40 \sim 85$ degrees C |  |
| Humidity | 5 ~ 95\% (non-condensing) |  |

### 3.2 LED Definition:

> System

| LED | Color | Function |
| :--- | :--- | :--- |
| DC1 | Green | Lights to indicate DC power input 1 has power. |
| DC2 | Green | Lights to indicate DC power input 2 has power. |
| Fault | Red | Lights to indicate that $A C$ or $D C$ power has <br> failed. |

## > Per 10/100BASE-TX Port

| LED | Color | Function |
| :--- | :--- | :--- |
| LNK/ <br> ACT | Green | Lights to indicate the link through that port is <br> successfully established. |
|  | Blinking to indicate that the switch is actively <br> sending or receiving data over that port. |  |
|  | Amber | Lights to indicate that the port is operating at <br> 100Mbps. |
|  | Off to indicates that the port is operating at <br> 10Mbps. <br> Off to indicates that the port is linked down. |  |

## 1. Package Contents

Thank you for purchasing PLANET Industrial Multi-port 10/100TX Fast Ethernet Switch, ISW-1600T/IFGS-1822TF. In the following sections, the term "Industrial Ethernet Switch" means the ISW-1600T or IFGS-1822TF.
Open the box of the Industrial Ethernet Switch and carefully
unpack it. The box should contain the following items:

If any of these are missing or damaged, please contact your deale immediately; if possible, retain the carton including the origina packing material, and use them again to repack the product in case
there is a need to return it to us for repair.

| Flow Control | IEEE 802.3x pause frame for full-duplex Back pressure for half-duplex |  |
| :---: | :---: | :---: |
| ESD Protection | 6 KV DC |  |
| Enclosure | IP30 metal case |  |
| Installation | DIN-rail kit and wall-mount kit |  |
| Connector | Removable 6-pin terminal block for power input <br> Pin $1 / 2$ for Power 1 , Pin $3 / 4$ for fault alarm, Pin 5/6 for Power 2 |  |
| Alarm | One relay output for power failure. Alarm relay current carry ability: $1 \mathrm{~A} @ 24 \mathrm{~V}$ DC |  |
| Dimensions $(W \times D \times H)$ | $66 \times 107 \times 152 \mathrm{~mm}$ | $66 \times 107 \times 152 \mathrm{~mm}$ |
| Weight | 2559 | 300 g |
| Power <br> Requirements | Dual $12 \sim 48 \mathrm{VDC}, 24 \mathrm{VAC}$ |  |
| Power Consumption | Max. 5.3 watts/18BTU (Ethernet full loading) | Max. 6.3 watts/21.4BTU (Ethernet full loading) |
| Standards Conformance |  |  |
| Regulatory Compliance | FCC Part 15 Class A, CE |  |
| Stability Testing | IEC60068-2-32 (free fall) IEC60068-2-27 (shock) IEC60068-2-6 (vibration) |  |

## 3. Hardware Introduction

### 3.1 Switch Front Panel

The front panel of the Industrial Ethernet Switch consists of Ethernet interfaces and LED indicators.

## > Front View

Figure 1:
ISW-1600T Front View

Figure 2: FGS-1822TF Front View

| > Per Gigabit RJ45/SFP Combo Interface (Port-17~Port-18 of IFGSW-1822TF) |  |  |
| :---: | :---: | :---: |
| LED | Color | Function |
| $\begin{aligned} & \text { LNK/ } \\ & \text { ACT } \end{aligned}$ | Green | Lights to indicate the link through that port is successfully established. |
|  |  | Blinking to indicate that the switch is actively sending or receiving data over that port. |
|  |  | Off to indicates that the port is linked down. |
| $\begin{aligned} & 1000 \\ & \text { Speed } \end{aligned}$ | Amber | Lights to indicate that the port is operating at 1000Mbps. |
|  |  | Off to indicates that the port is operating at 10/100Mbps. <br> Off to indicates that the port is linked down. |

### 3.3 Switch Upper Panel

The upper panel of the Industrial Ethernet Switch consists of one erminal block connector within two power input and one relay

Figure 3: ISW-1600T and IFGS-1822TF Top View

### 3.4 Wiring the Power Input

The 6 -contact terminal block connector on the top panel of inputs. Please follow the steps below to insert the por wir.

When performing any of the procedures like inserting the wires or tightening the wire-clamp screws, make sure the power is OFF to prevent from getting an electric shock.

Insert positive and negative DC power wires into contacts 1 and 2 for POWER 1, or contacts 5 and 6 for POWER 2.

2. Tighten the wire-clamp screws for preventing the wires from loosening.

## 4. Installation

This section describes the functionalities of the Industrial Ethernet Switch's components and guides you to installing it on the DIN
and wall. Please read this chapter completely before continuing.

```
# This following pictures show how to install the device
This following pictures show how to install the device,
or IFGS-1822TF.
```

### 4.1 DIN-rail Mounting Installation

PLANET Technology Corp.

## 5. Customer Support

Thank you for purchasing PLANET products. You can browse our solve your issue. If you need more support information, please contact PLANET switch support team.

User's Manual

Industrial 16-Port 10/100TX
Ethernet Switch
4.3 Side Wall-mount Plate Mounting

### 4.2 Wall-mount Plate Mounting

Insert the wires into the fault alarm contacts

1. The wire gauge for the terminal block should be in the range between 12 and 24 AWG
Note 2. Alarm relay circuit accepts up to $24 \mathrm{~V} D \mathrm{DC}, 1 \mathrm{~A}$

The fault alarm contacts are in the middle of the terminal block The fault alarm contacts are in the middle of the terminal block
connector as the pisture shows below. Inserting the wires, the Industrial Ethernet Switch will detect the fault status of the power failure and then forms an open circuit. The following illustration shows an application example for wiring the fault alarm contacts.

1. The wire gauge for the terminal block should be in the range between 12 and 24 AWG.
2. The power input range is $12 \mathrm{~V} \sim 48 \mathrm{VDC}$ and supports 24 V AC
3. Use one power input when using 24 V AC.

## FCC Warning

This equipment has been tested and found to comply with the regulations for a Class A digital device, pursuant to Part 15 of
the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with this user's guide, may cause harmfu in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

## CE Mark Warning

This is a Class A product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

## WEEE Warning

To avoid the potential effects on the environment and 7. human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should nderstand the meaning of the crossed-out wheeled bin symbol. Do collect such WEEE separately.
